PRODUCT GUIDE

Quarry-direct supply across Melbourne

Our Products

Sand, soil and rock.

Langwarrin Quarries supplies a range of sand, soil, and rock products. This guide is organised to help you select the right product for your project.

Sand Products

Please note: product photos are indicative only. As all Langwarrin Quarries sand products are naturally sourced, slight variations in size, colour, contents and appearance are to be expected. We strongly recommend contacting our sales office for further product information to ensure the product is suitable for your intended purpose.

Packing Sand

Product Details

A naturally occurring resource screened through 10mm media to produce a fine-grained sand. Packing Sand compacts to a firm hard stand and is ideal as a bedding layer beneath block, brick and tile pavements. Colour and moisture content vary naturally.

Turf Sand

Product Details

A 10mm-minus sand, turf sand is the go-to choice for top dressing sports fields, recreation grounds and high-use lawns, delivering a level, free-draining surface that supports healthy root growth.

Sand Products

Please note: product photos are indicative only. As all Langwarrin Quarries sand products are naturally sourced, slight variations in size, colour, contents and appearance are to be expected. We strongly recommend contacting our sales office for further product information to ensure the product is suitable for your intended purpose.

Brick Sand

Product Details

A 5mm fine-grained sand commonly used by builders and landscapers for brick laying mortar and general construction work. Brick Sand provides reliable workability and binding qualities, making it a staple product for trade and DIY brick projects alike.

Yellow Brick Sand

Product Details

A 5mm screen, fine-grained sand used by builders and landscapers to blend mortar for brick laying or as a base layer beneath paving. Yellow Brick Sand offers consistent workability and a warm tone that complements a wide range of brick colours and paving styles.

Sand Products

Please note: product photos are indicative only. As all Langwarrin Quarries sand products are naturally sourced, slight variations in size, colour, contents and appearance are to be expected. We strongly recommend contacting our sales office for further product information to ensure the product is suitable for your intended purpose.

Top Garden Soil

Product Details

A 10mm screened garden soil, easy to spread, suiting new garden beds, top-ups and landscape jobs. Ideal for blending with organic materials such as wood chips and compost to enhance vegetation growth, or used straight as a bulk garden soil. Also known as sandy loam.

Rock Products

Please note: product photos are indicative only. As all Langwarrin Quarries rock products are naturally sourced, slight variations in size, colour, contents and appearance are to be expected. We strongly recommend contacting our sales office for further product information to ensure the product is suitable for your intended purpose.

**Type A
Structural Fill**

Product Details

A naturally occurring, mechanically ripped rock product. Type A Structural Fill is widely used in road construction for embankments, bulk fill and load-bearing applications.

**Type B
Rock Fill**

Product Details

A naturally occurring, mechanically ripped and stockpiled rock. Type B Rock Fill is a general-use fill suited to road construction and hardstand areas.

Rock Products

Please note: product photos are indicative only. As all Langwarrin Quarries rock products are naturally sourced, slight variations in size, colour, contents and appearance are to be expected. We strongly recommend contacting our sales office for further product information to ensure the product is suitable for your intended purpose.

**20mm Commercial
Crushed Rock (NDCR)**

Product Details

A crushed and screened natural rock product graded to 20mm minus. Generally used under concrete pavements and across hardstand areas, this compacts firmly and binds tightly. Also known as 20mm NDCR.

**40mm Commercial
Crushed Rock (NDCR)**

Product Details

A crushed and screened natural rock product graded to 40mm minus. Generally used under concrete pavements and across hardstand areas, this compacts firmly and binds tightly. Also known as 40mm NDCR.

Rock Products

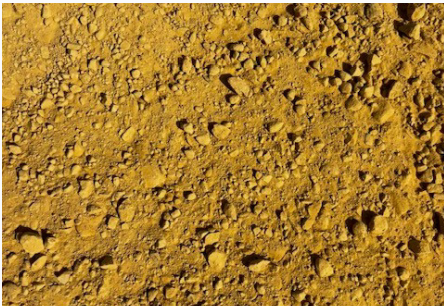

Please note: product photos are indicative only. As all Langwarrin Quarries rock products are naturally sourced, slight variations in size, colour, contents and appearance are to be expected. We strongly recommend contacting our sales office for further product information to ensure the product is suitable for your intended purpose.

120/20mm Rubble

Product Details

A coarse crushed sandstone/siltstone/mudstone, graded from 120mm down to 20mm. Rubble is the ideal product for building road access on construction sites and forming temporary haul tracks, providing a fast, free-draining surface that stands up to heavy site traffic.

LQ Toppings

Product Details

A 16mm minus sandstone/siltstone/mudstone material with mostly fines, that suit garden paths, and landscape features where a natural, low maintenance finish with no drainage. is preferred.

Rock Products

Please note: product photos are indicative only. As all Langwarrin Quarries rock products are naturally sourced, slight variations in size, colour, contents and appearance are to be expected. We strongly recommend contacting our sales office for further product information to ensure the product is suitable for your intended purpose.
